

Duomax 1030 (10° tilt angle)

P/N: 543-32210-00

Containers are safely fixed on the anti-slip rubber mat even at high speeds. The speed is variably adjustable between 2 and 50 rpm. The shaker can be operated in continuous operation or with a timer (max. 120 minutes).

A tilt angle of 5° is recommended for applications for which a gentle movement amplitude is suitable. If the application requires stronger shaking, the model can also be obtained with an angle of 10°.

Additionally, the Duomax 1030 can be integrated into the modular incubator model.

Duomax 1030 (10° tilt angle) - Technical Data
